Dear Colleague

CONTINUATION OF IMMUNISATION PROGRAMMES DURING COVID-19

1. As you will be fully aware, with the ongoing COVID-19 outbreak NHS Boards and HSCPs are currently postponing various elective and non-urgent work to prioritise work related to this outbreak. The purpose of this letter is to inform you that immunisation programmes should not be classified as non-urgent work.

2. The immunisation schedules in the UK are based on the recommendation of the Joint Committee on Vaccination and Immunisation (JCVI) and careful consideration has been given on the timing of the vaccines to be given to protect people against serious infectious diseases, taking into account the epidemiology of these infections. It is therefore important that vaccines are given on time as recommended by the schedule to maximise benefits by protecting people at a time of the greatest risk from these infections.

3. Vaccination programmes in Scotland bring great benefits to the whole of the population and it would not be possible without the ongoing support of those staff involved in the delivery of these programmes. We would also like to take this opportunity to acknowledge the extraordinary work to date of all NHS staff in responding to this global outbreak of COVID-19, and to thank all health staff for their continued hard work and dedication in responding to the increased pressure during this rapidly evolving situation.

Yours sincerely,

Catherine Calderwood  Fiona McQueen  Rose Marie Parr

Chief Medical Officer  Chief Nursing Officer  Chief Pharmaceutical Officer
